

Case Study

Strengthening Cybersecurity & IT Risk Readiness for a Government-Aligned Organization

Client Overview

Industry: Government Contractor / Regulated Services Organization

Organization Size: Mid-Size (50–200 Employees)

Engagement Type: Cybersecurity & IT Risk Readiness Assessment, Infrastructure Stabilization, Governance & Ongoing Support

Executive Summary

A mid-size, government-aligned organization engaged All Proven IT Solutions LLC to assess and remediate cybersecurity, infrastructure, and compliance risks. The engagement delivered improved risk posture, governance clarity, and audit readiness.

Business Challenges

- Limited visibility into cybersecurity vulnerabilities
- Unstructured IT governance
- Compliance gaps affecting audit readiness
- Outdated infrastructure
- Reactive IT support model

Approach

- Executive Risk Readiness Assessment
- Governance & Documentation Alignment
- Infrastructure Stabilization & Risk Mitigation
- Ongoing Support & Advisory

Results

- Reduced cybersecurity risk exposure
- Improved audit readiness
- Increased system reliability
- Proactive IT operations model

Conclusion

All Proven IT Solutions delivered a scalable, defensible IT environment enabling secure growth and compliance confidence.
